

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Newly retired, after spending several years working with his brother to assemble their crane company into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

All through their journey, John reacquainted himself with former business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could promptly and securely lift people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John established a partnership with two friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they created and sold the first JLG aerial work platform. The company incorporates some of the basic design elements of that original lift into current models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into quite a few global marketplaces and continues to develop new machinery to ensure that clients are able to become safer and more well-organized within their workplace.
