

Work Platform

Work Platforms - Lift truck platforms provide a lot more flexibility for people who work off of a forklift. These platforms are useful machinery because they offer a high level of safety for staff on top of them as well for the people underneath. Lift truck platforms are an economical answer for companies since they are a lot more cost efficient compared to purchasing specialized machines. These platforms are also desirable as they can save a lot of storage space. To make the most of the advantage and full potential of this particular equipment, you will have to find the platform which best suits the work tasks you have in mind.

Slip-On platforms are easy to set up in view of the fact that all you do is slide them onto the lift truck, lock them into place and they are ready to operate. Slip-on style attachments have gained huge popularity as they are easy and quick to work. They offer an economical solution for companies that do not need them often. These platforms have a railing system in place, skid proof decking and tie offs available. They still need the use of safety machinery by employees but come with these specific features so as to further the safety of those who will be utilizing them. Slip-on work platforms are the perfect choice for those projects which take place in difficult spaces or over top of an object.

This kind of platform lift can be secured using a pin after sliding the platform onto the forks. The industrial lift stand provides extra protection with three rails and a safety screen covering the rear. For additional safety, it is a great idea to consider selecting a kind that opens through the front railing instead of the side gate unit.

Stock pickers can mount onto a lift truck with the same foundations as the other platforms even though they are quite different. Stock pickers have a slighter base surrounded by barrier on three sides and its protector partition is located on the front. This model differs from the various platforms since the cage and the surface do not take up the whole fork surface area.

Combination platforms have proven to be very handy whenever staff need to work with supplies a height. This kind of platform has a larger and smaller section. This design is significant so that workers can accomplish their job and not have to worry themselves about any supplies sliding onto them if the one operating it tips or tilts the objects.

There are lots of accessories existing that can connect to your platform that will improve its efficiency a lot more. For larger supply objects like piping, tall racks can be outfitted with guardrails. These racks keep supplies such as pipes, brooms and various stuff from falling off of the platform and hitting other workers. For further proficiency, there are trays, tools and toolboxes made to attach directly onto the side of the guardrails.
