

Forklift Electrical Part

Forklift Electrical Parts - Forklifts can be specifically marked for use in dangerous places. A marked truck denotes the design has met the minimum standards of ANSI/UL 558 meant for engine powered forklifts or ANSI/UL 583 intended for electric forklifts for the type of label attached.

The application for labels used for lift forklifts may be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance carrier and Fire Marshall for additional information regarding the permitted uses of industrial powered forklifts in your application.

If the certain forklift satisfies the outlined standards, labels may be attached. A labeled forklift would show the type of designation located on the nameplate and will have a properly corresponding label put.
